

THE GUNNISON

Our most popular line, **The Gunnison** canning system can produce a quick 25-30 cans per minute. Its ultra-compact footprint has made it popular with mobile canning operations, as well as small and medium size beverage producers with limited space. Its versatility and quick change over for additional can diameters allows businesses producing more than one can size to maximize efficiency. With a wide array of infeed and outfeed options, this machine can be custom configured.

One or more features of this machine are protected by United States Patent

SPECS

- **Dimensions:** 52" L (1320mm) X 26" D (660mm) X 60" H (1520mm)
- **Cans Per Minute:** 25-30
- **Weight:** 450 lbs. (204 kg)
- **Air:** 4.3 CFM @ 90 PSI
- **Can Options:** Slim, Sleek, Standard
- **Power Requirements:** 120V or 230V 1-phase (50/60hz)
- **CO2:** 25 PSI @ .75 CFM
- **Beverages capable:** Beer, Wine, Coffee, Kombucha, RTD, Soda, Water, Juice, THC infused, CBD Infused

IMPORTANT FEATURES
